

# MV-90 Testing of Direct Analogue Telephone Lines

MTR Working Group Meeting

September 14, 2005

Tuire Pickering

- q Direct lines (16) now installed to a single MV-Comm workstation**
- q MV-90 database has been updated in a test environment**
  - Remove leading “9” in Recorder Master File telephone number**
- q Manual calling of some “difficult” meters has been successful**
- q Remote Interrogations of all Registered Wholesale Meters will be scheduled for more comprehensive testing outside of the normal IESO production calling schedule**
