

PUBLIC SECTOR

The Public Service Sector is supportive of the overall direction and intent of the IESO Business Strategies presented in the document entitled Summary of IESO Strategy Discussion with Stakeholder Advisory Committee.

Our sector continues to see the transparency and reconciliation of the Global Adjustment issues as a priority for the IESO. We are also interested in seeing work done to ensure price signal and pricing transparency continue over time. As many of our members are pursuing alternative energies, we are pleased to see the integration and modeling of renewable technologies and the move to more 'traditional' stand by capacity generation. We would also be supportive of the IESO dedicating additional resources to this business plan to ensure success of the strategies presented within. In a time when both the electricity market and economy are in a period of unprecedented change, it is imperative that the IESO be able to manage this change. Holding the line on IESO costs to promote corporate fiscal responsibility may have adverse and unintended influence on the core mission and the proposed strategic strategies in this business plan.
