

# Overview of FOMS Design Documents

Webcast

February 2, 2007

- Documents posted on Jan. 29, 2007
  - IESO\_SPEC\_0251 MP Manage Equipment Summary
  - IESO\_SPEC\_0252 FOMS Application Program Interface
- Comments on the documents are due on February 9, 2007.

- IESO\_SPEC\_0251 MP Manage Equipment Summary
  - Very similar functions to the Outage Summary View
  - Configure columns, colours, filters
  - Export data function useful for extracting equipment data lists
- Comments on the functions?

- IESO\_SPEC\_0252 FOMS Application Program Interface (API)
- This document provides the technical interface specifications to market participants who will be interfacing with the outage system through an automated process.
- This document highlights the functions that are available via an API.

- Available Functions:

- Create New Outage Request
- Confirm Outage Request ID
- Update an Existing Outage Request
- Retrieve Changed Outage Requests Since the Previous Request
- Retrieve Changed Outage Requests Between a Date Range
- Retrieve Outage Requests
- Retrieve Equipment Records

- IESO\_SPEC\_0252 FOMS Application Program Interface (continued)
- Are there other functions that are needed to support the outage approval process? What are they and why are they needed?

Questions??

- Comments are due for both documents on February 9, 2007. Comments are to be sent to [stakeholder.engagement@ieso.ca](mailto:stakeholder.engagement@ieso.ca)
- IESO response to those comments will be posted on February 23<sup>rd</sup> and communicated to participants.
