

Summary of MM and Form Revisions for UAT

The EDAC versions of the Market Manuals were reviewed following the IESO Business Process Integration Testing (BPIT) and in preparation for User Acceptance Testing (UAT). A summary of the revisions is shown in the table below.

Document Name	Summary of Revisions
EDAC_PRO_0014 MM1.1 - Participant Authorization, Maintenance & Exit	- No changes.
EDAC_PRO_0016 MM1.2 - Facility Registration, Maintenance and De-registration	- Spare Generation on Line (SGOL) replaced with Real-Time Generation Cost Guarantee (RT-GCG). - All references to SGOL replaced with RT-GCG.
EDAC_MAN_0004 MM4.0 - Market Operations Overview	- Figures 3-2 & 3-3 revised to remove references to IMO and standardize time format (e.g. 10:00)
EDAC_PRO_0027 MM4.2 - Submission of Dispatch Data in the Real-Time Energy and Operating Reserve Markets	- Changed "Participant Life Cycle (PLC)" references to "IESO Registration Solution". - Revised time format in Figure 2-1. - Spare Generation on Line (SGOL) replaced with Real-Time Generation Cost Guarantee (RT-GCG). - All references to SGOL replaced with RT-GCG.
EDAC_PRO_0034 MM4.3 - Real Time Scheduling of the Physical Markets	- Changed "Participant Life Cycle (PLC)" references to "IESO Registration Solution".
EDAC_PRO_0033 MM7.2 - Near-Term Assessments and Reports	- Changed "Participant Life Cycle (PLC)" references to "IESO Registration Solution". - Updated for IESO Baselines 24.1 & 25.
EDAC_PRO_0035 MM7.3 - Outage Management	- Changed "Participant Life Cycle (PLC)" references to "IESO Registration Solution". - Figure 1-3 Changed "IMO" references to "IESO" as well as time format. (i.e. 10:00 EST instead of 1000 EST).
EDAC_MAN_0041 MM9.0 - Day-Ahead Commitment Process Overview	- No changes.
EDAC_MAN_0076 MM9.1 - Submitting Registration Data for the Day-Ahead Commitment Process	- Minor wording changes.
EDAC_MAN_0077 MM9.2 - Submission of Operational and Market Data for the Day-Ahead Commitment process	- Note added to section 5.1.4.2 Eligible Energy Limited Resources. Note: The Day Ahead Calculation Engine (DACE) applies the DEL in hour ending one to all hours of the day. Therefore, if you wish to update your DEL during the DACP, the first hour DEL value should be changed to match any subsequent hours.
EDAC_MAN_0078 MM9.3 - Operation of Day-Ahead Commitment Process	- No changes.
EDAC_MAN_0079 MM9.4 - Real Time Integration of the Day-Ahead Commitment Process	- No changes.
IMO_FORM_1552, Real-Time Generation Cost Guarantee and Day-Ahead Production Cost Guarantee Data Form	- Revised PART 2B – FACILITY INFORMATION FOR STEAM GENERATORS as per PAG members comments

Note 1: The changes in this table are reflected in v2.1 of the documents. Red-line versions of the revised MM will be posted for PAG review and comment. All Market Manuals will be Baseline at v3.0 for user acceptance testing and will include changes for IESO Baseline 24.1 & 25.

Note 2: MM5.5 and MM9.5 are still under review to determine if any revisions are required.
