Subject: Market Rule Communication for SE-91

Members of SE-91 / Dispatch Technical Working Group
=====

The market rule amendment proposals for Dispatching Variable Generation and Floor Prices for Variable and Nuclear Generation have been posted to the IESO website for consideration at the July 17 Technical Panel meeting.

The proposals, (MR-00381-R02: Dispatching Variable Generation, and MR-00381-R03: Floor Prices for Variable and Nuclear Generation) can be reviewed on the Technical Panel webpage:

http://www.ieso.ca/imoweb/amendments/tp_meetings.asp .

The IESO has recommended that the Technical Panel agree to post the rule amendment proposals for stakeholder comment for a period of eight weeks, ending on September 13, 2012. Additionally a schedule for market manual development on floor prices, as requested by stakeholders, will be made available at next Floor Price Focus Group meeting.

These proposals are the first set of rule amendments related to variable generation dispatch and offer floor prices. Proposals for market rules related to CMSC and tie-breaking are scheduled to be brought to Technical Panel in August allowing stakeholders to view and comment on all dispatch-related market rules prior to September 13, 2012. The proposals are based on stakeholder consultations through SE-91 Renewable Integration which includes the Dispatch Technical Working Group (DTWG) and the Floor Price Focus Group (FPFG).
