Subject: RE: **Acknowledgement**RE: SE-97 Proposal Feedback - OPA

Hi Daniela,

I wanted to make one minor clarification to the comments that I submitted last week (see below). Please forward the revised comments to the appropriate people. Also, feel free to post the comments on the IESO's website.

Thanks

REVISED OPA COMMENTS:

As a member of the OPA's settlement group, I wanted to voice our collective concern with the proposals most recently brought forward under SE-97 on April 9, 2013:

http://ieso.ca/imoweb/pubs/consult/se97/SE97-20130409-Market_Data_Proposal.pdf

The OPA uses the market summary reports on a regular basis for verification of market data inputs used in settlement calculations for our generation procurement contracts.

More specifically, the OPA uses the 'Hourly Nodal Prices', '3-Hour Ahead Pre-Dispatch', 'HOEP', and 'Daily Operating Reserve Prices' market summary reports regularly.

OPA counterparties have also expressed their concern with the most recent SE-97 proposal.

Thank you for your consideration,

Stuart Macpherson
