A985	Registration Automation - Web based tool to create & maintain master data	N/A	NA	Completed	RT: 16-Sep-13 NRT: N/A	Under Development	NA	<p>Description of Problem: As part of the IESO’s enrolment automation project, IESO is introducing a Registration System for participants. The Registration System is one of many deliverables in the enrolment automation project to allow participants to submit, update and review master data on their own. For this release the IESO will make available the first part of a web interface to allow users to access a few functions out of the many that will be released in subsequent IESO releases.</p> <p>The Online Registration Working Group (SE-108) provides feedback on the features, look and functions of the new system. Information on the group is available at: http://www.ieso.ca/imoweb/consult/consult_se108.asp</p> <p>Description of Result: This change will provide registered participants access to a web based Registration system. The first release will allow them to perform the following functions:</p> <ol style="list-style-type: none"> 1. Rights administration: Registered Rights Administrators can submit requests for access to information systems directly to IESO, reducing wait times. 2. Based on their access roles, registered participants can immediately update organization contacts, ending manual processing times and eliminating the paper form. 3. Each person must maintain his or her business contact information online, resulting more consistency and complete updates.
