Subject: Conference Call - New York Transaction Failure Update - December 18, 2007

The following table provided by the NYISO lists the messages that the participant receives. It is in Technical Bulletin 58 dated 11/10/2004. The column to the left (will not be added to the TB) will be the communication that will be invoked between the 2 control rooms. NY has indicated that the word "constraint" in the S+ and S- codes should be added for clarity (don't know if they are going to do this or not). The RTC will be interpreted as economic and coded as OTH and will attract the appropriate failure charge. Security will remain the same as today.

Implementation date and time of this will be discussed on the conference call.

NYISO Operator to IESO Operator	Message Code	Message Explanation
	Z	Not Evaluated
	E	Evaluation fully accepted transaction
RTC	U	Evaluation fully rejected uneconomical transaction
RTC	M	Evaluation partially accepted marginal cost transaction
RTC	S+	Evaluation partially to fully accepted transaction due to security
RTC	S-	Evaluation partially to fully rejected transaction due to security
Security	D	Evaluation partially to fully rejected transaction due to DNI ramp constraint
Security		After RTC evaluation NYISO Operator curtails transaction

The **teleconference details** are as follows:

Tuesday December, 18, 2007
01:00 pm - 01:30 pm

Local 416.472.5080
Toll Free 1.877.323.2005
International 800.6059.2969
Conference ID 4550353

Thanks,
Dave Robitaille
