Subject: Notice of Conference Call for August 4, 10 to 11 am - MR-00370-R00: Limit CMSC for Exports and Dispatchable Load with Negative Bids

This email is being sent to members of the Inter-Jurisdictional Trading Standing Committee (IJTSC)

At the July 6th Technical Panel meeting, the members requested that the revised amendment proposal be posted for stakeholder comment (refer to July 8th IESO Weekly Bulletin <http://www.ieso.ca/imoweb/news/bulletinItem.asp?bulletinID=5276>). That proposal describes the additional analysis the IESO performed in response to feedback from the IJT and Technical Panel. We are proposing to have a conference call on August 4 to discuss your comments. In order to have an effective discussion, we need written comments in advance so that we have time to thoughtfully consider the comments. Please submit your comments to stakeholder engagement (stakeholder.engagement@ieso.ca) along with your confirmation of attendance on the conference call.

Thanks,

Dave Robitaille
Chair, IJTSC
